2026 Fall Newsletter

For those of you who have been with us for a while this summer, thank you for helping us make Shelburne Camping a peaceful and relaxing experience for everyone. As we transition from our summer to winter season, we'd like to share some information that will help you with your winter preparation.

Our winter season is from November 1 through March 31. If you plan on staying past November 1 and have not secured a reservation for the winter season yet, you will need to contact the office. Winter sites are on a first come first serve basis. Available sites are filling up fast. Closure of the bathhouse and water off to most of our campsites will occur November 1. If you have reserved a winter water site, water to your site will continue to flow. If you have a reservation for a winter water fill site, we fill fresh water holding tanks on Wednesdays. If you would like us to fill your tank, please make arrangements with us to view the water fill location on your camper. You will not need to be home for us to fill your tank.

Starting November 1, we will reduce our office hours and days when the office is open for the winter season. If you would like to stay updated on our office hours please give the office a call, check the Front Door of the office or you can find the office hours posted on our website. As always, we are happy to schedule another time to meet if that should work best for you.

If you are insulating or putting skirting around your camper as part of your winterization plan, please be aware that the only preauthorized skirting at the camping area is hay bales in black plastic bags. If you are planning on using hay bales, you can order them through our office for a fee and have them delivered to your site. You can also feel free to find your own source for hay bales. Any other skirting material must be approved through our office prior to installation.

In the spring, you can also make arrangements with us for hay disposal on the camping area property. We do charge a fee. Please contact the office for pricing. It is not permitted to dispose of any winterization materials in our dumpster. Our dumpsters are for household trash only. Foam board, tarps, or any other materials must be disposed of off the camping area property. Spring cleanup for winterization materials is required by April 1.
